Education

Neil Gogte Institute of Technology **2022 – 2026**
B.Tech in Computer Science (AI & ML) – CGPA: 8.62 *Hyderabad, India*

Experience

Tektalis | Associate Software Engineer **June 2026 – Present**
Python, FastAPI, React, Spring Boot, MySQL, CMMN *Hyderabad, India*

- Developed enterprise applications using **Python, FastAPI, React, and TypeScript**, contributing to backend services, frontend interfaces, RESTful APIs, and integrations.
- Worked on **PRO-Connect**, a bilingual CRM and membership platform supporting member management, events, activities, administration, and mailing workflows.
- Implemented authentication, database models, business logic, and React features for PRO-Connect's membership and administrative workflows.
- Designed and configured **CMMN case models** in CaseFabric for dynamic workflows, case plans, tasks, and process logic.
- Integrated CaseFabric models with **Spring Boot services and existing APIs**, performing integration testing, debugging, and issue resolution.

Tektalis | Software Development Intern **Dec 2025 – May 2026**
Java, Spring Boot, React, PostgreSQL, Python, FastAPI *Hyderabad, India*

- Developed an **Employee Management System** using **Java, Spring Boot, React, and PostgreSQL** to support employee and administrative workflows.
- Built RESTful APIs for employee data management, authentication, and application workflows, integrating backend services with a responsive React frontend.
- Integrated an **AI-powered chatbot** using **Python and FastAPI** to enable conversational assistance within the application.
- Contributed to database design, API integration, software testing, debugging, and deployment activities across the software development lifecycle.

Projects

MindPrint | Python, FastAPI, Next.js, MySQL, CatBoost **Sept 2026**

- Built a personality prediction platform combining writing analysis with adaptive quizzes to estimate users' MBTI-style personality types.
- Developed four personality-axis models using **CatBoost, Scikit-learn, and TF-IDF** features, with adaptive questions based on model uncertainty.
- Implemented authentication, password reset, prediction history, confidence scores, and a responsive interface using **FastAPI, Next.js, React, and MySQL**.

YouTubeXnotes | React, TypeScript, Node.js, Supabase, Prisma **Mar 2025**

- Built a distraction-free learning platform for watching YouTube playlists and creating structured notes alongside videos.
- Implemented playlist management, progress tracking, Markdown notes, authentication, and cloud synchronization using **Supabase**.
- Developed REST APIs and a responsive interface using **Node.js, Express, React, TypeScript, Prisma, and PostgreSQL**.

Air Quality Predictor | Python, XGBoost, FastAPI, ASP.NET Core **Jan 2026**

- Built an AQI prediction system using pollutant data from **OpenAQ** and weather data from **Open-Meteo** for Indian cities.
- Developed preprocessing, feature engineering, and model-training pipelines using **Pandas, NumPy, Scikit-learn, and XGBoost**.
- Served predictions through a **FastAPI** backend with an ASP.NET Core dashboard for AQI categories, trends, and health recommendations.

Technical Skills

Skills: Python, Java, C, SQL, JavaScript, TypeScript, HTML, CSS, React
Frameworks & Tools: FastAPI, Spring Boot, Next.js, Node.js, Flask, ASP.NET Core, MySQL, PostgreSQL, MongoDB, Supabase, Prisma, Docker, Git
Practices: System Architecture, Application Design, Software Testing, Debugging, Agile Methodologies, CMMN
